

Adjustable Frame & Grate

➤ Exclusively for SquareMax™ Floor Sinks

Unique Solution

Adjust height and correct for a level grate quickly and easily
No more breaking up concrete to replace a tilted fixture!
Perfect for retrofit/repair or in remodel applications, where
tile or other flooring is added

Easy to Install

Installs in place of standard PVC grates in SquareMax
fixtures that are too low, or tilted
Leveling screws adjust easily to provide
a perfect finish

Eliminate low or
tilted fixtures

TAKE THE FIELD.

Before:

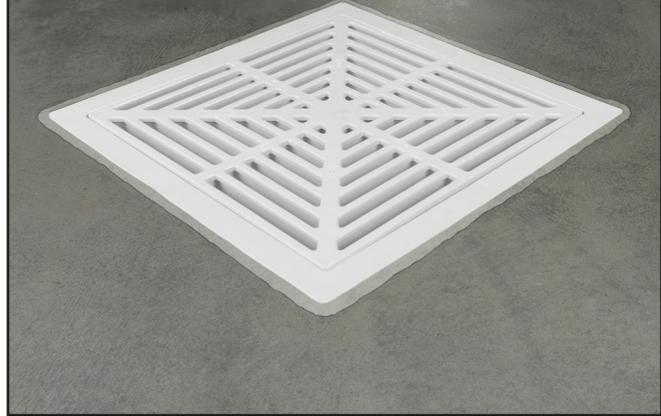

SquareMax floor sink is below flush and/or tilted after slab pour

Remove the existing strainer (if present).
Install screws (provided) into bottom of adjustable frame

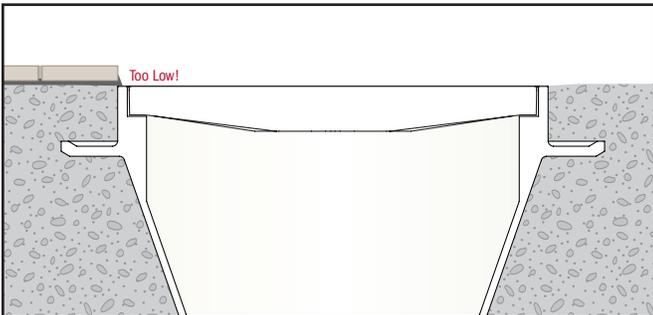

After:

Adjustable replacement frame/grate provides a flush, level finish

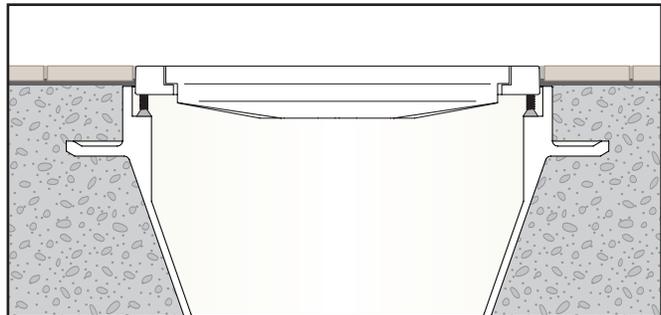

Adjust screws for level and install grate
Caulk the gap for a perfect finish

Perfect when adding tile or other flooring

Even when fixture is installed flush/level with slab, adding tile or other flooring later can leave the grate too low, creating a trip hazard.

Install the adjustable frame and level with the new/added flooring. The separate frame allows the grate to be removed and replaced as needed.
