RE: **Using the Edge Bracket™ as a Hangs Tuff Extension**

Sioux Chief Manufacturing's Edge™ Bracket is an inexpensive solution for any installer needing to extend the length of the Hangs Tuff™ DWV pipe hangers.

- Simply place the Hangs Tuff DWV pipe hanger inside the angle of the Edge bracket so that the stem of the J-shaped hanger is located no less than 3" from either end of the metal Edge bracket.
- Secure the plastic Hangs Tuff hanger to the metal Edge bracket by using two #6 through #10 screws.
- Secure the Edge bracket to the joist or stud with nails or screws.
- Always make sure DWV pipe is installed according to the national plumbing codes requirements for proper slope of the pipe.

If you have any questions regarding this product solution, please don't hesitate to call me at (800) 821-3944, Ext. 290. Thank you for considering and/or using Sioux Chief products.

Sincerely,

Carol Flanagan
Product Group Director – Support
